SUMMARY

Full-stack developer, experienced in writing modular, readable, and minimalistic code without losing sight of the users' needs. Builds scalable backends, responsive frontends, and intuitive mobile apps.

EXPERIENCE

Dev BootCamp | Oct 2014 - Feb 2015

Full-Stack Web Development Student

- Built a range of applications, from lightweight web widgets to a decoupled iOS/Android mobile application.
- Designed applications using Object-Oriented (OO) principles, Model View Controller (MVC) architecture, and RESTful routing patterns.
- Employed agile methodologies, pair programming, version control, iterative software practices, and test-driven development.
- Learned how to learn: became adept at researching and implementing new technologies.

eBay Inc. (StubHub) | Jun 2009 - Jul 2014

Senior Content Analyst/Product Support Specialist

- Performed quality control and mobile optimization on the events and venues appearing in StubHub's iPhone and Spotify applications.
- Wrote MySQL database queries and iMacros automation scripts to manage and debug content and to supplement the in-house CMS.
- Acted as the project lead for three key projects focused on internal content standards and task delegation.

Operations Support Specialist

- Managed quality assurance on thousands of listings monthly within Zvents.com's catalog, using the content management system and JIRA.
- Automated event creation, event merging, data-scraping, and other common content tasks.

PROJECTS

OurHouse

iOS and Android mobile app for coordinating housemates' social events, chores, and payments.

Technologies:
Angular, Ionic, Rails, CSS3, HTML5, Sass (SCSS), OAuth, Google+ API, Venmo API

Main Contributions:
Angular and Ionic, along with refactoring and modularizing the backend

RAPTORFrame

A light, modular framework for rapid development of modern frontend projects.

Technologies:
JavaScript, CSS3, HTML5, Sass (SCSS), Gulp, RAPTORSMACSS, ESLint, Imagemin

Features:
Lints, compiles and minifies SCSS and JS; provides Gulp workflow and NPM devtools with custom scripts

KittyParty

Team chat app where users can only communicate through messages with GIFS.

Technologies:
ES2015 (Babel), Angular, Node, Express, jQuery, Sass (SCSS), RAPTORFrame, Gulp, Giphy API

Features:
Tokenizes and translates a user's message into a GIF through the Giphy API

SKILLS

Languages
JavaScript, CSS3, HTML5, Python, Ruby, Shell Script (zsh), SQL

Frameworks and Libraries
jQuery, AJAX, Sass (SCSS), Gulp.js, Node.js, AngularJS, Ruby on Rails, Ionic Framework, Foundation, Bootstrap

Methodologies
RESTful Routing, Agile, Scrum, SMACSS, TDD, BDD, UX Workflow, Wireframing, Responsive Design, Mobile-First Design, Object-Oriented Design, Documentation (Markdown, LaTeX)

EDUCATION

Dev Bootcamp
Full Stack Web Development & Design
Software Engineering

Certifications
Cisco CCNA Routing & Switching Certified
Cisco CCENT Certified
Coursera Algorithms: Design & Analysis I Certificate

De Anza College
Associate of Science - Science, Math & Engineering
