EXPERIENCE

DEV BOOTCAMP 2014–2015 | San Francisco, CA
FULL-STACK WEB DEVELOPMENT STUDENT

- Built a range of applications, from lightweight web widgets to a decoupled iOS/Android mobile application
- Employed algorithmic thinking, agile development, version control, iterative software practices, database design, test-driven development, and production environment maintenance
- Learned how to learn: became adept at researching and implementing new technologies quickly and efficiently

EBAY INC. (STUBHUB) 2009–2014 | San Francisco, CA
SENIOR CONTENT ANALYST/PRODUCT SUPPORT SPECIALIST

- Performed quality control and mobile optimization on the events and venues appearing in StubHub's iPhone and Spotify applications
- Wrote MySQL database queries and iMacros automation scripts to manage and debug content and to supplement the in-house CMS
- Acted as the project lead for three key projects focused on internal content standards and task delegation

OPERATIONS SUPPORT SPECIALIST

- Managed quality assurance on thousands of listings monthly within Zvents.com's catalog, using the content management system and JIRA
- Automated event creation, event merging, data-scraping, and other common content tasks
- Assisted the New Experiences team in various ad impressions and advertising projects

EDUCATION
